mxHero **Mail2Cloud**

Email to Box Integration Technology - **Deployment Options**

mxHero

mxHero Mail2Cloud provides intelligent email to cloud storage integration, enabling organizations to better secure, govern and manage their important email content. mxHero files email messages and attachments in the cloud **seamlessly extending the powerful content management capabilities of Box to the organization's email content.**

The mxHero Advantage

- Cloud (SaaS), private cloud & on-prem
- Works with all email systems - on prem. and cloud (Exchange, O365, G Suite, etc.)
- Works across every device
- Outlook add-in option for easy drag&drop to Box
- Works how you work, no new system to learn: just email and Box

Product Spotlight

- Box collaboration features extended to email content
- Automatic & intelligent security based on email content
- Powerful & flexible auto-filing based on message & attachment content
- Significant reduction in email system & infrastructure costs & complexity
- Automatically tags email messages and attachments with email metadata (sender, recipient(s), date, etc.)
- Open and action (reply, forward) email directly from the cloud

Email is an important record of your business transactions and agreements, your compliant communications, and regulated conversations. Email also contains sensitive company intellectual property and critical business intelligence. mxHero simplifies your current email governance practices by capturing email from any source, intelligently analyzing the contents, appropriately tagging it, and organizing it into Box governed folders. mxHero and Box provide security & governance from a single, simple solution for all your content – document and email.

MxHero offers three deployment options ranging from fully managed SaaS delivery to entirely on-premises solution to satisfy the most stringent security requirements.

Deployment Options

Cloud (SaaS)

- SaaS delivery from AWS
- Fully managed service
- Fully encrypted connectivity
- 100% uptime 2016

Private Cloud

- mxHero from your AWS account
- Delivered as Amazon Machine Image (AMI)
- Ready integration with AWS platform (Cloud Trails, Cloud Watch, etc.)

On-Premises

- Docker container
- Internal datacenter deployment
- Other private cloud: Azure, etc.
- Satisfies most stringent security requirements
